EXPERIENCE AND TRAINING

Generation Junior Full Stack Java Developer Program | *Trainee* | Remote   April 2022 to Present
- Participating in a 15-week Junior Full Stack Java Developer Certification Program with June 2022 date of completion.
- Upon completion, will have accrued 460+ training hours applying technologies required to create full stack web applications with Java, including Spring Boot Framework, Spring Data JPA, Spring Security, Dependency Injection, implementing basic unit tests, and deploying applications to Heroku.

Uplift Education | *Math Teacher* | Fort Worth, Texas   August 2021 to March 2022
- Effectively developed and implemented math curriculum for a class of 75 students.
- Gathered and used data to create concise and effective instruction.
- Frequently communicated with parents regarding students' progress and possible gaps.
- Ensured all students were meeting appropriate state standards.
- Provided necessary accommodations and modifications for growth and success of all students.

Uplift Education | *Math Teacher's Assistant* | Fort Worth, Texas   August 2019 to August 2021
- Assisted lead teacher with implementation of curriculum for 140 students.
- Organized small groups to help lessen educational gaps students may have faced.
- Coordinated and executed after school test preparation for 140 students.
- Piloted after-school anime club to build community and camaraderie among students.

PROJECTS: https://github.com/elliottparedes

Instant Messenger Program
- Built front end in React using Web Sockets to connect users to each other and to a custom API.
- Used Bootstrap to create responsive and dynamic web pages.
- Designed and built Web Socket Server in NodeJS to connect front end to MongoDB database.
- Secured front End HTML, CSS, and JavaScript with Auth0.

Small Business Website – Nino's Tacos
- Built and deployed a website using HTML, CSS and JavaScript for local taco vendor in Dallas, TX
- Built REST API to save customer quote and contact request into a MongoDB database.
- Used Google Mail API to alert business owner to quote and contact requests.
